Crossover Cable Protectors

For more than 30 years, Lex Products has manufactured safe, durable products that reliably endure ongoing rough use in shipyards, ports and naval facilities across the United States. As one of the nation's largest portable power manufacturers, Lex is committed to delivering decades of innovation and expertise, including:

- Ship to Shore Power
- Shipyard Maintenance and Repair Equipment
- Power Distribution
- Cable Protection
- Portable Compact Lighting for Narrow Workspaces
- Custom Products Designed for Specific Power Needs

Lex pioneered rubber molded power distribution boxes and EverGrip® molded cable assemblies. Heavy-duty rubber enclosed power distribution units are resistant to shock, impact and corrosion, and are a superior choice in transferring portable power in industrial facilities near water.

Quality is assured through ISO 9001:2015 and AS9100:2016 Rev. D process certifications for design and manufacture by IPC/WHMA-A-620 certified technicians.

Have a specific power need? Lex engineers will work with you to design and manufacture custom power distribution units, portable transformers, connectorized switchgear and automatic transfer switches for your application, safety, functionality and budget specifications.

Electric Power Distribution Products for Ship Building & Repair Applications

Lex Products sales are coordinated through direct field sales locations as well as sales support staff in both the Shelton, CT and Pacoima, CA locations. Territory sales are supported by an internal sales and support department to satisfy daily customer needs. In addition, Lex Products provides technical support for all of its products.
